Our Expert Presenters

Walter Holtrop is responsible for the Training Program content and providing technical advice on asphalt and sprayed work. Prior to joining AAPA he spent over 25 years with VicRoads, with extensive experience in road construction and maintenance. He is a recognised specialist in asphalt and sprayed work, has carried out several overseas consultancies and is also a specialist CPEE lecturer.

John Patane is a Professional Engineer and held a number of positions in quarrying at Conrock before joining Soil Surveys and Exploration as a Geotechnical Engineer. John held the position of Principle Engineer (Road Surfacing) in the Queensland Department of Main Roads and later became a Project Manager at Neumann Contractors. In 2008 he commenced his own engineering consultancy.

Rob Vos joined AAPA in 2000, after 10 years as Technical Director for the Southern African Bitumen Association (SABITA), and senior pavements engineering positions in key government departments. Rob's pavements technology awareness was recognised throughout Southern Africa, and his standing in Australia is following a similar path.

Greg Miller is a Chartered Professional Engineer with over 35 years' professional experience in the road construction and maintenance industry. He has held positions with the Highways Department in South Australia, Works Tasmania and Roadways. Greg retired in 2006 and undertakes contract work for Roadways and AAPA.

Other presenters are drawn from senior levels in industry and state road authorities to provide a balanced and authoritative training panel.

A 'fast track' towards Certificate IV

Customised courses can be tailored to accelerate your employees' progress towards the new national qualifications in bituminous surfacing.

Opportunities for further education

If your tertiary qualified employees are interested in achieving higher qualifications in the pavements industry, we can design a program of customised courses to equip them for study towards a Graduate Certificate or even a Masters degree in Pavement Technology.

e-mail: trainingcentre@aapa.asn.au
or write to AAPA at Level 2, 5 Wellington Street, Kew Vic 3101.

The AAPA Training Centre is the flexible pavements industry's leading Registered Training Provider

customised training

Why should you consider customised training courses in flexible pavements?

Interest in customised courses is growing rapidly!

This type of training is especially popular when an organisation wants to enrol personnel in a course, but the timing – or the location – isn't suitable.

Or perhaps the standard course content isn't quite what you're looking for...

Customised courses are the answer! They can be presented at the most suitable time and place – either “in-house” at your premises, at a nearby venue or even on-site. If there are specific topics or requirements that aren't covered by our existing courses, or you'd like to have one of our courses customised to more closely meet your needs, we'll work with you to design the most appropriate content.

'Mix and Match'

You can take segments from any of our existing courses and have them presented in a format and a time frame to suit. And we can cover any topic in 'overview', or in detail, or anywhere in between.

Focus on location or operational aspects

We can tailor a course to focus on your needs, problems or local conditions. We can even use your own case studies and current projects as working examples.

Worried about confidentiality?

With a customised course there are no 'outsiders' looking over your shoulder, so your staff can discuss their work freely in a team environment.

Value for money

You'll find customised courses might be the most economical way to meet your training needs. Cut down on the expense of travel and accommodation, and take advantage of our group rates to train extra personnel. And using your own premises will mean you'll save even more!

Join forces for 'value add-on'

Do you belong to a regional organisation or a group of like minded companies? Why not get together with them for a joint customised course? Pick a central location and plan a training program to cover topics of mutual interest – your staff will gain additional benefit from the interaction and sharing of others' experiences.

Topics include

- ★ Asphalt Placement & Compaction
- ★ Asphalt Specification & Selection for Best Value
- ★ Bituminous Surfacing Principles & Practice
- ★ Fundamentals of Bituminous Surfacing
- ★ Pavement Maintenance Practices
- ★ Pavement Maintenance – Rehabilitation & Asset Management
- ★ Polymer Modified Binders/Bituminous Emulsions
- ★ “Nuts and Bolts” of Maintenance
- ★ Selection of Pavement Surfacing
- ★ Sprayed Sealing – Selection & Design
- ★ Sprayed Sealing – Field Procedures
- ★ Safe Bitumen & Hot Mix Handling – Induction/Refresher

Contact the AAPA Training Centre on (03) 9853 5322 to discuss your customised training needs!

- ★ **Save time**
- ★ **Save money**
- ★ **Focus on your training needs**
- ★ **Your location**
- ★ **Fit in with your works program**

About the AAPA Training Centre

The AAPA Training Centre is Australia's foremost provider of quality training courses on all aspects of asphalt and bituminous surfacing.

A registered training provider, the Training Centre is your one-stop shop for all your flexible pavements training needs!

The Training Centre presents a program of around 90 courses each year in all capital cities and many regional centres, in addition to customised courses for member companies and local government.

Our presenters are recognised experts in their field, and will ensure your delegates receive authoritative, up-to-date and relevant information, delivered in an informal and supportive learning environment.

Certificates of Attendance, Statements of Attainment, comprehensive course notes and access to the latest technical industry documentation and specifications are additional benefits offered by the AAPA Training Centre.
