POSTGRADUATE AWARDS

Operating since 1996, CPEE offers specialist awards with a focus on Pavement Technology including highly specialised units of study. As an accredited private provider of higher education a CPEE award offers a valuable alternative to face to face studies and offers a truly global educational tool for learning. CPEE has partnered with the University of Tasmania to offer an additional range of awards to broaden our offerings in the areas of Infrastructure Asset Management and Road Engineering.

The ability to undertake study anywhere in the world via our dedicated online Learning Management System allows working practitioners to further their formal education to complement their current employment needs. As an accredited private provider of higher education and quality accredited to ISO 9001; CPEE is the professional answer for specialist learning.

UNITS OF STUDY

- Fundamentals of Roads and Pavements
- Road Pavement Design
- Pavement Construction
- Road & Pavement Surfacings
- Heavy Duty Pavements
- Pavement Management Systems & Performance
- Road Asset Management
- Road Construction & Drainage Principles
- Project Evaluation & Management
- Pavement Renewal - Rehabilitation & Reconstruction
- Road & Pavement Maintenance
- Industry Research
- Asset Management - Fundamentals
- Asset Management - Practices
- Infrastructure Financial Management
- Contracts: Principles, Management & Risks
- Work Based Project
- Water Essentials
- Management of Water Assets & Risks
CPEE SHORT COURSES

CPEE Short Courses offer up to date content presented by industry expert practitioners. These practical hands on courses are conducted face-to-face in a classroom setting operating in various locations around Australia, in both capital cities and larger regional centres. Customised courses cater for specific locations and tailored content.

The subject range provides for a broader mix of road and pavement engineering and construction subjects to suit the background of delegates as well as future interests and career development.

Delegates are provided with a Delegate Pack including comprehensive course notes and power point presentations and a Certificate of Attendance.

The technical content of CPEE short courses is based on relevant CPEE postgraduate online learning study units and Austroads guides and are facilitated and presented by recognised expert practitioners in the field. The number of hours involved are fully acceptable toward Continuing Professional Development (CPD) standing.

CPEE short courses are supported by Austroads, AAPA, Roads Australia, AustStab, IPWEA and ASCP and State and Territory Road Authorities.

TARGETED AWARD PROGRAMS

CPEE’s unique and targeted online learning awards are well regarded by the whole of the roads and pavements industry, including state and local governments. These practical programs encourage the direct application of the skills and knowledge acquired into the workplace. The online learning format aids study for those employed in demanding jobs and remote areas. The programs provide students with the knowledge and skills to fill senior positions in these specialist fields within state & local government, public works authorities, contractors and with engineering consultants and infrastructure managers.

Our tailored programs are designed to suit the needs of individuals wishing to enhance their learning, career opportunities or to become a specialist in their field.
