To book please contact AAPA:
(03) 8416 4500 or trainingcentre@aapa.asn.au
www.aapa.asn.au/training

Scope:
+ This course provides essential instruction on safety for ALL personnel involved in storing, handling, working near, or supervising the use of, hot bituminous materials and asphalt.
+ The competency mapped course consists of formal presentations, highlight videos of hazards, guidance and selection on the correct use of fire extinguishers.
+ Covers risk minimisation strategies for common hazards present on bituminous surfacing sites including burns, boilovers, explosions, fire, inhalation of fumes and reversing plant.

Outcomes:
+ Course is now mapped to the theory competency outcomes required to meet RIICBS203D – Safely Handle Bituminous Materials.
+ If participants required the Statement of Attainment to achieve the RIICBS203D unit of competency, further information is required to be sent to AAPA’s course endorsed RTO – RudTek

Assessment:
+ Mapped to the Nationally recognised unit of competency, participant assessment for the theory component is required. A workbook shall be fully completed throughout the course.
+ To receive the Statement of Attainment (SoA), participants must download and complete the documents required by the RTO (Registered Training Organisation) and send all required documentation to RudTek RTO. The cost of the assessment for all AAPA attendees is $100 and will be on charged by the RTO, only to participants who seek the SoA
